

This sample demonstrates how to download a Word document from URL.

Microsoft Word is a word processor designed by Microsoft. It was first released in 1983 under the name Multi-Tool Word for Xenix systems. Subsequent versions were later written for several other platforms including IBM PCs running DOS (1983), the Apple Macintosh (1984), the AT&T Unix PC (1985), Atari ST (1986), SCO UNIX, OS/2, and Microsoft Windows (1989).

Microsoft Office Word instead of merely Microsoft Word. The 2010 version appears to be branded as Microsoft Word, once again. The current versions are Microsoft Word 2010 for Windows and 2008 for Mac.
